

DISCRETE MATHEMATICS
VOLUME 154, NUMBERS 1-3, 15 JUNE 1996

CONTENTS

<i>M. Bousquet-Mélou</i> A method for the enumeration of various classes of column-convex polygons	1
<i>J.I. Brown and S. Watson</i> The number of complements of a topology on n points is at least 2^n (except for some special cases)	27
<i>K.H. Chew</i> Total chromatic number of regular graphs of odd order and high degree	41
<i>P.J. Grabner, R.F. Tichy and U.T. Zimmermann</i> Inequalities for the gamma function with applications to permanents	53
<i>A.J. Guelzow</i> Representation of finite nilpotent squags	63
<i>P. Gvozđjak and J. Nešetřil</i> High girth and extendability	77
<i>J. Heath and A.J.W. Hilton</i> At most k -to-1 mappings between graphs, II	85
<i>W.C. Huffman</i> The equivalence of two cyclic objects on pq elements	103
<i>K. Jansen</i> A rainbow about T -colorings for complete graphs	129
<i>D.M. Kulkarni</i> Counting of paths and coefficients of the Hilbert polynomial of a determinantal ideal	141
<i>T. Lu</i> The enumeration of trees with and without given limbs	153
<i>P. Maschlanka and L. Volkmann</i> Independence number in n -extendable graphs	167
<i>S. McGuinness</i> On bounding the chromatic number of L -graphs	179
<i>F.R. McMorris and H.M. Mulder</i> Subpath acyclic digraphs	189
<i>D.Q. Naiman and H.P. Wynn</i> Independence number and the complexity of families of sets	203
<i>J.L. Pfaltz</i> Closure lattices	217
<i>N.D. Tan</i> Cubic (m, n) -metacirculant graphs which are not Cayley graphs	237
<i>C.-Q. Zhang</i> Nowhere-zero 4-flows and cycle double covers	245

Notes

<i>J.O. Cerdeira and P. Barcia</i> Ordered matroids and regular independence systems	255
<i>P. Erdős, A. Gyárfás and T. Łuczak</i> Graphs in which each C_4 spans K_4	263
<i>F. Gerth III</i> Some probabilities for eigenvalues of matrices with entries in finite fields	269
<i>S. Hougardy</i> Even pairs and the strong perfect graph conjecture	277
<i>H. Jacob and H. Meyniel</i> About quasi-kernels in a digraph	279
<i>K.M. Koh and B.P. Tan</i> Number of 4-kings in bipartite tournaments with no 3-kings	281
<i>K.M. Koh and C.P. Teo</i> Chromaticity of series-parallel graphs	289
<i>X. Li and H. Zhang</i> A solution to Gutman's problem on the characteristic polynomial of a bipartite graph	297
<i>N. Macris and J.V. Pulé</i> An alternative formula for the number of Euler trails for a class of digraphs	301
<i>R. Meshulam</i> On products of projections	307
<i>H.J. Prömel and A. Steger</i> Counting H -free graphs	311
<i>U. Schulte</i> Constructing trees in bipartite graphs	317
<i>M. Tkáč</i> On the shortness exponent of 1-tough, maximal planar graphs	321
Author index to volume 154	329
